80 SCRUM MASTER

In waterfall methodology, the duration of the activities, like development, testing, etc. are

In waterfall, the project team often gets early feedback from customers or markets about the

What factors will increase complexity? Select all that apply.

Building complex products like software is a complex adaptive problem. Complex adaptive problems are

Select all that apply. Empiricism provides

Select the best answer. Scrum is a newer way of doing things to address complex problems. It is a newer way because...

Scrum effectively limits the risk of unknowingly doing something wrong by

Scrum has been used to

Scrum team is focused on

To reduce the likelihood of not meeting big commitments, scrum uses

Select all that apply. The formal opportunities for inspection and adaptation are

Select all that apply. The scrum framework consists of

Select all that apply. In scrum, the product owner who plays the business role...

In scrum, the 'servant leader' is the new name for the traditional role called 'project manager'

The scrum master is the manager of the scrum team.

In a traditional approach, manages the team members' work, and their management style.

In self-managing teams, the work is divided between individual team members. Each team member takes accountability for the progress of only their work.

In their journey to deliver products of the highest business value, what factors will enable

As a self-managing team, what can a scrum team manage? Select all that apply.

In scrum, team velocity is a good metric to track the progress of product development.

A scrum team must produce the following artifacts. Select all that

Scrum team create six artifacts: product backlog, sprint backlog, increment, product goal, sprint goal, definition of done.

Transparency, inspection, and adaptation are the three pillars of

Transparency in empiricism refers to

What is used by the scrum team to identify unfinished work in a sprint?

Developer is requested by an important stakeholder to help them with an urgent and important task outside the sprint goal. The team member set aside the sprint work for the day and help with this request. Which of the following statement best describes the team member's actions?

Is scrum immutable?

The organization or senior management's support

The next sprint starts

Only the product owner can come up with items that can be considered for the product

The scrum team has which of the following roles? Select all that apply.

Before starting the first sprint, what needs to be in place? Select all that apply.

What is the size of the scrum team?

When a scrum team adds a new member, the productivity

In backlog refinement sessions, the developers will code and test.

Which of the following statements is correct?

How does the scrum team define the Definition of Done?

The developers do not have enough understanding of the product they are developing. The scrum master should not care because the

The role of the scrum master with respect to the scrum artifacts is to

During a sprint review, the stakeholders notice that the product development progress is not clearly visible and lacks transparency. Moreover, they are not able to understand the development team's next steps. Who bears the primary

A developer is requested by an important stakeholder to help them with some external task because it is urgently required by the organization's board. The developer referred them to the product owner. In this case, the scrum master

The number one priority of the product owner is

An organization forms scrum teams each with a size of 15 members because it is a convenient

A scrum team builds the product increment that almost meets the conditions set by the

A scrum team decides that the frequency of the daily scrum should be reduced to once a week.

Who must participate in the sprint review?

Who performs inspections in scrum events? Select all that apply.

A customer wants to communicate something very relevant and important about the product to the scrum team. Who should they talk to?

Only the product owner communicates with the stakeholders.

A developer identifies a technical issue that requires other developers to work together to solve this. Who needs to facilitate this?

In the early days of a product development's initial sprint, the product backlog

The primary objective behind why a scrum master ensures that the scrum team and those

Sprint backlogs contain items for improvement that were identified in the sprint retrospective.

What does the sprint goal provide?

Which estimation unit must be used by the developers for the work needed to convert the selected product backlog items into a working product increment?

The sprint backlog is modified throughout the sprint. What would happen as soon as a new task is identified?

A scrum team decides to divide the sprint backlog and assign ownership of every sprint backlog item to separate individuals on the team. The scrum master should do what?

During the sprint, while the sprint backlog can be modified as more is learned, no changes are made that would endanger the sprint goal.

Since the team is self-managing in scrum and they manage their own work, they do not need any planning to perform their work.

During the daily scrum, a team member says he does not know when his task will be complete.

In scrum, the usage of the burn down chart is a foolproof way of estimating the completion of product development.

Within every sprint, the working increment should be tested progressively starting from unit testing, then integration testing, and finally user acceptance testing.

In the sprint review, the presentation of the product increment to stakeholders is

The difference between the product burn-down chart and the sprint burn-down chart is...

Select all that apply. The sprint review is an event that requires

Which of the following statements is true?

What is the length of the daily scrum?

What should be the frequency of inspection in scrum? Select all that apply.

The Definition of Done provides a checklist of quality measures to take the increment to a potentially usable state, while the acceptance criteria focus on specifying the business features or functionalities.

74 After a sprint review, the product owner deems that the product has come to an end. What is the next step?

The scrum team gathers for the sprint planning meeting. The product owner has some stories, but the team finds that the stories do not provide enough information to make a forecast. What should be done next?

A scrum team maintains a sprint burn-down to track estimated remaining work. In the middle of the sprint, the burn-down graph shows an upward spike. What does this indicate?

The value attached to the product backlog

After sprint planning, the product backlog items selected into the sprint backlog are frozen and cannot be modified. The only way to modify the sprint backlog is to have the product owner cancel the sprint.

For a scrum team, the sprint planning meeting are always going beyond the time box. What could be the likely causes? Select all that apply.

Should you have more than 10 people on your scrum team?
